

HONEY DROP PECORINO

Our company "Street Food" has been producing "Pecorino Toscano DOP" with honey for a long time.

Our firm is specialized in all types of cheese and it also produces grated cheese. Pecorino is produced in Tuscany and is sold in the best famous supermarkets all over Europe, above all in the Netherlands. Many people eat our Pecorino, which is advertised on TV and on our website, where you can buy all types of products such as cheese and even our new product. Our honey is produced in the famous Suvereto hills in Tuscany.

Now we want to launch this new product **honey drop pecorino** on the market.

Our new product is very delicate because our cheese contains honey drops. This product is sold at about 20 euro a kilo so it is quite expensive but the company offers new customers a discount for the purchase of five products and shipping is free.

The company has created an innovative handmade packaging for this new product, which is targeted at people who want to eat refined food. It can be tasted during meals and dinners with friends. You can also taste our product in our store and in the main Cheese Fairs.

If you need further information you can contact our company at 0582 35221 or you can write an e-mail at StreetFood@hotmail.it.
