

Coffee Grappa

San Quintino Company has been producing wine for a long time. Our company, which is located in San Miniato, has a production of 150,000 bottles a year and it has improved its production by using new machines in the last five years.

Thanks to these machines we can launch a new product on the market: "Coffee Grappa", which isn't a simple Grappa because we have been

planning a new type of Grappa with coffee beans inside the bottle, which give a tasty and delicate flavour to the product, for a long time.

We offer a small bottle containing half a litre of Coffee Grappa and a big bottle containing a litre of Coffee Grappa.

This special product is very expensive for our company because we carry out all parts of the production by ourselves. Coffee Grappa has a good price which varies from 10 € for the small bottle to 12€ for the big bottle.

The packaging for our tasty product is a black and brown bottle, with a cork and an etiquette with the name of our company : San Quintino and the name of the product.

We sell our Coffee Grappa to restaurants and pubs above all but you can also find our product and other types of wine in our shop ,which is located in San Miniato .

In order to promote our fantastic Coffee Grappa we will create posters, brochures and Internet adverts.

You can also buy our products on our new website, where you can find our catalogue and prices of our whole range of products.
